NOTICE OF ENVIRONMENTAL SITE REVIEW

(August 3, 2012)

In anticipation of the filing of a Notice of Intent (NOI) and Pre-Application Document for three hydroelectric projects owned and operated by TransCanada Hydro Northeast Inc. (TransCanada) in New Hampshire and Vermont (Wilder Dam Hydroelectric Project No. 1892, Bellows Falls Hydroelectric Project No. 1855, and Vernon Dam Hydroelectric Project No. 1904), and two projects owned and operated by FirstLight Power Resources in Massachusetts (Northfield Mountain Pumped Storage Hydroelectric Project No. 2485, and Turners Falls Hydroelectric Project No. 1889), all located on the Connecticut River, the Federal Energy Regulatory Commission (Commission) will be hosting an environmental site review for each of the projects during the first week of October 2012.

The environmental site reviews are being held to provide all stakeholders, interested in the projects' pending relicensing proceedings, an opportunity to view the projects' facilities and surrounding areas.

Under the Commission's Integrated Licensing Process, the Commission conducts its National Environmental Policy Act (NEPA) scoping meeting within 90 days of the filing of the Licensee's Notice of Intent. An environmental site review is typically held in conjunction with that scoping meeting. However, access to some project facilities may be limited by winter weather during the early part of 2013 when scoping for this project is currently anticipated. For this reason, the Commission has chosen to host the environmental site reviews in October before the onset of winter. While the Commission expects to host its NEPA scoping meetings for the projects in early 2013, it will not conduct the environmental site reviews at that time. As such, the Commission encourages all interested parties to participate in the October environmental site review(s) to facilitate

productive scoping meetings early next year. Details of the project specific environmental site reviews follow.
